BITUMEN 60/70

TECHNICAL SPECIFICATION

Bitumen 60/70		
Test	Methodology	Value
Density	ASTM D-7	1/01 – 1/05
Penetration Rate at 25°C	ASTM D-5	60-70
Softening Point °C	ASTM D-36	49-56
Ductility at 25°C (cm) – Min	ASTM D-113	100
Flash Point °C – Min	ASTM D-92	250
Solubility in disulfide %wt	ASTM D-4	99/5
Satin Test	AASHTO T 102	Negative
Weight Loss by Heating %wt – MAX	ASTM D-6	0/2
Penetration Loss by Heating % – MAX	ASTM D-6 – D-5	20

BITUMEN 60/70

ABOUT THE PRODUCT

Penetration Grade 60/70 is the most widely used and internationally traded paving bitumen produced in the Middle East, especially in Iran. This grade offers an ideal balance between hardness and flexibility, making it highly suitable for moderate and temperate climates.

It is primarily used in the production of asphalt for highways, urban roads, airport pavements, and heavy-traffic infrastructure projects. Due to its excellent adhesive and waterproofing properties, **Bitumen 60/70** ensures durable pavement performance and long service life.

In international trade markets, particularly in the Persian Gulf region, **Bitumen 60/70** is considered the benchmark grade and often serves as the base reference price for export transactions.

ADVANTAGES

- ✓ Easy production and quality control
- ✓ Internationally recognized and widely accepted standard
- ✓ Reliable mechanical performance at moderate temperatures
- ✓ Extensive historical performance data and proven track record

BITUMEN 60/70

AVAILABLE PACKAGING OPTIONS

Barrel
180 ± 5 Kg

Jumbo Bag
1000 ± 50 Kg

Bulk
24000 ± 200 kg

Why Us

- multi-source of supply
- fast and efficient global distribution
- reliable inventory and supply continuity
- reduced geopolitical and supply chain risks

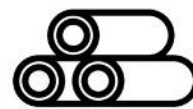

APPLICATIONS

Road Construction

Waterproofing

Asphalt Mixtures
